EDUCATION

GITAM UNIVERSITY, VSP
Bachelor of Technology in Computer Science Engineering

2022 -2026
CGPA: 7.56

PROFESSIONAL EXPERIENCE

AI/ML INTERN *RELIANCE-JIOPLATFORMS LIMITED (JPL)* *MAY 2025 | JULY 2025*

- Prepared and curated a custom noisy-speech dataset and evaluated pretrained speech enhancement models (Demucs, Conv-TasNet, DeepFilterNet, SpeechBrain, Resemble Enhance, NoiseReduce) under real-world conditions.
- Achieved improved speech clarity and higher SDR using DeepFilterNet-based noise suppression.
- Conducted comparative benchmarking to identify the most efficient model for deployment.

AIESEC in Visakhapatnam *Jan 2024 / Jan 2025*

TeamLeader-Marketing&BrandManagement

- Awarded “Best Member” (2024); progressed from General Body Member to Team Leader – Marketing, leading a 3-member team.
- Managed logistics and vendor coordination for Youth Speak Forum & Global Goals Run 2024, generating ₹1.2L+ revenue and increasing engagement by 40%.

PROJECTS

FireDetection using ResNet50 (Deep Learning | Computer Vision) GITHUB REPO

- Built a CNN-based fire detection model using ResNet50 for early fire identification in images and video streams.
- Fine-tuned the pretrained network on labeled fire/non-fire datasets to improve detection accuracy.
- Achieved robust performance under varying lighting and background conditions, enabling faster emergency response.

Smart Traffic Violation Detection System | AWS, YOLO, Computer Vision

- Developed an automated traffic violation detection system to identify helmetless riding and triple riding using YOLO-based object detection.
- Integrated AWS services (Lambda, SNS, S3) for real-time violation alerts and evidence storage.
- Enabled scalable cloud deployment, reducing manual traffic monitoring effort.

Smart Parking System (IoT | NodeMCU | Blynk)

- Designed a smart parking solution to monitor parking slot availability using sensor-based detection
- Implemented cloud-based data storage and real-time status updates for efficient parking management
- Reduced parking congestion and improved space utilization through automated slot tracking

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified AI
- Foundations Python Data Structures
- Entrepreneurship I Laying the Foundation

ACHIEVEMENTS

- Awarded Best Member 2024.1 – AIESEC in Visakhapatnam
- Led large-scale events like Youth Speak Forum and Global Goals Run • Built 3+ real-time IoT/AI projects showcased in demos and tech reviews

TECHNICAL SKILLS

Languages: Python, C, Java, SQL

Domains: Machine Learning, Deep Learning, Embedded Systems, IoT

Frameworks & Libraries: OpenCV, TensorFlow, PyTorch, Pandas, Numpy, Scikit-Learn, Matplotlib

Tools: Anaconda, Arduino IDE, GitHub, Excel, PowerPoint, MySQL, SQLite

Soft Skills: Rapport Building, Stakeholder Management, People Management, Communication
